

A First, each segment holds on its own

B Then demand one and the same witness

a common source word w must satisfy

one evaluation function, two values

$$\text{ev}_1(w) = 0 \quad \text{first tick}$$

$$\text{ev}_1(w) = 1 \quad \text{last tick}$$

$$0 \neq 1$$

even with $\text{ev}_0(w) = 0$ in between,
the first and last already contradict.
